

KERMIT FACILITY

Warehouse and Liquid Mud Plant

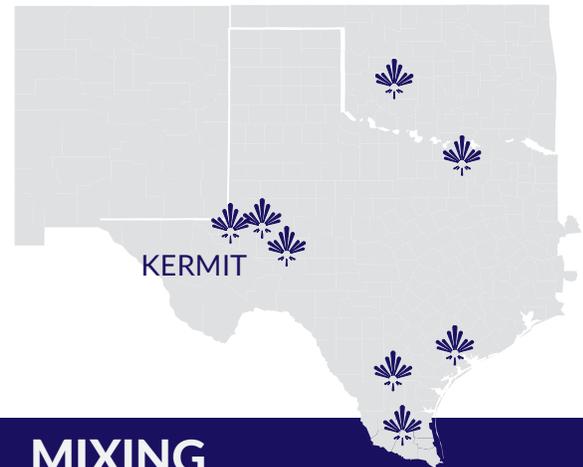

The Kermit facility in Winkler County sits on 27 acres featuring a 12,000 square foot warehouse, mixing facility, and bulk storage. Kermit operates on 24-hour regional dispatch with a mud engineer on duty at all times to perform required mud checks in the on-site mud testing lab.

FACILITY OVERVIEW

The Kermit facility services the Permian Basin with a full mixing facility and chemical warehouse. The liquid mud plant supports water-based, oil-based, or synthetic-based drilling fluids.

Chemical inventory includes key drilling fluid additives, including bulk barite and lost circulation material. Chemical storage is available in the 12,000 square foot warehouse or outdoors in dedicated areas on the 27 acre site.

AES Drilling Fluids is constantly upgrading facilities to meet the needs of its customers. Confirm the latest capabilities and locations with an AES account manager.

STORAGE

OBM Plant:

6x 500bbl oil-based mud mixing pits

29,500bbls of oil-based mud storage in the berm

16,000bbl additional storage in frac tanks.

500bbls freshwater, 2,000bbls of CaCl₂ brine, and 6,300bbls of diesel storage in the berm

4,500bbls of diesel/chemical storage available in Bulk Liquid Terminal

WBM Plant:

3x 500bbl and 1x 300bbl water-based mud mixing pits.

2,000bbl of water-based mud base fluid storage in the berm

500bbls Freshwater, 2,500bbls of NaCl brine in the berm

Kermit Blending Facility:

12x 800bbl tanks and 3x 260bbl blend tanks for chemical blending and storage

Bulk Barite Facility:

3,850 tons of bulk barite storage, including 4x 350-ton top loading silos and

7 x200-ton high pressure silos w/Dust Collector

MIXING

6 x 500 bbl invert emulsion mixing tanks

2 x 500 bbl water-base mixing tanks

3 x 260bbl chemical blending tanks

Super-sack handling capability

EQUIPMENT

Mud lab (quality control)

Shuttlewagon

Barite Kiosk system

On site mechanic shop

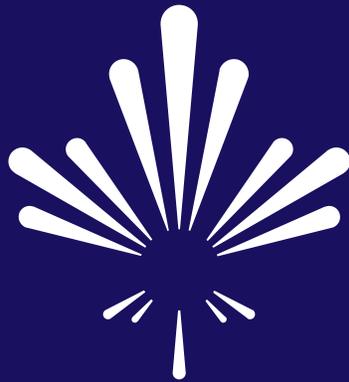

Liquid railcar unloading capability

Bonded Spur

Dust Control Truck
